

LEVERAGE *the* FIELD *for* SUCCESS

Keynote Topics

Leadership: Create a strategic vision based on Field attributes to ensure and accelerate success

Teamwork: Embed innovation and grow high performers by leveraging Field-based techniques

Diversity: Understand and harness the power of diversity using Field-based techniques

Management: Learn Field-centered coaching techniques that will lead to lower staff turnover, higher productivity, and increased innovation

Innovation: Harness tools and mechanisms of the Field to create a culture of sustained innovation

Book Review: McKey essentially describes how to achieve one's full potential using Field concepts. Studies are generously sprinkled through this immensely readable book. An invigorating read for all and an indispensable guide for business owners and managers. Highly Recommended.

Grady H.

Based on his career as a data analytics leader with a Big Four firm and his understanding of quantum physics, John Jay McKey had an epiphany in July 2014 that led to the writing of his book, *LEVERAGE THE FIELD FOR SUCCESS – Using Quantum Reality to Succeed in the Corporate World*. McKey now speaks to corporations, conferences, and at weekend programs on the structure of the quantum field (“the Field”) and how the Field can be engaged to accelerate success in the workplace. McKey has also authored articles for *ChiefExecutive.com*, *StrategyDriven.com*, and *Recruiter.com*.

The understanding that everything is connected at a quantum level is profound. By knowing the Field exists, we can rely on it, we can use it, and we can accomplish so much more. And now I know how to put it (the Field) into action to help me in the future.

Priscilla F., Financial Planner

The talk was really powerful because – as a business person – it took some concepts that I intuitively understood and gave it a framework that's real [the Field]. And that helps my left brain: instead of having a feel about a decision, I can shift to knowing it's the right decision.

Craig D., Senior VP, SDI

I particularly enjoyed the summary and the clarity of the science. To see it presented in one package in a very relatable way was very exciting. The instantaneous communication aspect of the Field was eye-opening and really raises awareness of my thoughts and intentions.

Tom R., Healthcare Consultant, Educator
